

DU Internet des objets (Internet of things)

Niveau de
diplôme
BAC +2

Langues
d'enseignement
Anglais

Présentation

- * A Spring-term international programme (late January-late June)
- * English-taught class welcoming both French and international students
- * Tutorials, practical classes and group project

Objectifs

- * Teach students what the IoT is, and its different aspects: security, cloud, infrastructure and programming, fog computing
- * Allow IT students to specialize in the field of IoT
- * Offer international and French students the opportunity to develop their technical and computing skills while focusing on a booming field that is expected to keep growing in the coming years
- * Train students to work in groups and with people from different educational and cultural backgrounds
- * Teach students how to carry out a project from A to Z; teach them about project management
- * Offer international students the opportunity to study in a region at the heart of Europe
