

Country Risk Assessment and Management (GEST904_MZECY)

En bref

- > **Langues d'enseignement:** Anglais
- > **Méthodes d'enseignement:** En présence
- > **Ouvert aux étudiants en échange:** Oui

Présentation

Objectifs

Emerging markets, once primary regarded for cost saving reasons are now strategic consumers markets. Operating successfully in these markets has become a business imperative for most sectors of the global economy.

Aside from "classic risk" (strategic risk; business risk; operational risk...), there are also specific aspects of risks related to emerging markets, often described as "country risk". Country risk is a broad concept that comprises an underlying combination of economics, finance, geopolitics, sociology... issues. More specifically this broad concept includes a multitude of specific risks (political instability, corruption, lack of transparency, red tape...) which have to be identified, assess and manage. As the new global economy raises the level of uncertainty and complexity for the international firm's cross-border strategy, country risk analysis has become today an essential component of strategy decisions regarding export, direct investment, partnership and mergers, as well as takeovers.

The objectives of this course are the following:

- * Appreciate the changing nature of country risk
- * Explain the role of country risk management within a company global risk management strategy

* Provide a basic set of methodological tools in order to evaluate the binomial risks / opportunities associated with business initiatives in emerging economies

Heures d'enseignement

CM Cours Magistral 15h
