Présentation

Objectifs

This module aims to enable students to understand the main issues of the management of innovation and to appreciate the relevant skills needed to manage innovation at both strategic and operational levels.

The management of innovation is one of the most important and challenging aspect of modern organization. Innovation is a fundamental driver of competitiveness and it plays a large part in improving quality of life. Given this, it is essential that students understand the strategies, tools and techniques for managing innovation, which often requires a different set of management knowledge and skills from those employed in everyday business administration.

The course is structured around three main topics:

1) What is innovation and what are the searching strategies for innovation

2) How can the firm organize internally to develop new products and services and best capture value from these innovation

3) With whom should the firm cooperate to maximize innovation.

Patents : Looking up legal information and use it properly

Heures d’enseignement

Strategic innovation management - TD

Travaux Dirigés
20h
